

Air Quality and Clean Energy Dialogue: Strengthening emissions standards for coal-fired power plants

Rooms 4 & 5, BCCK

11 November 2018

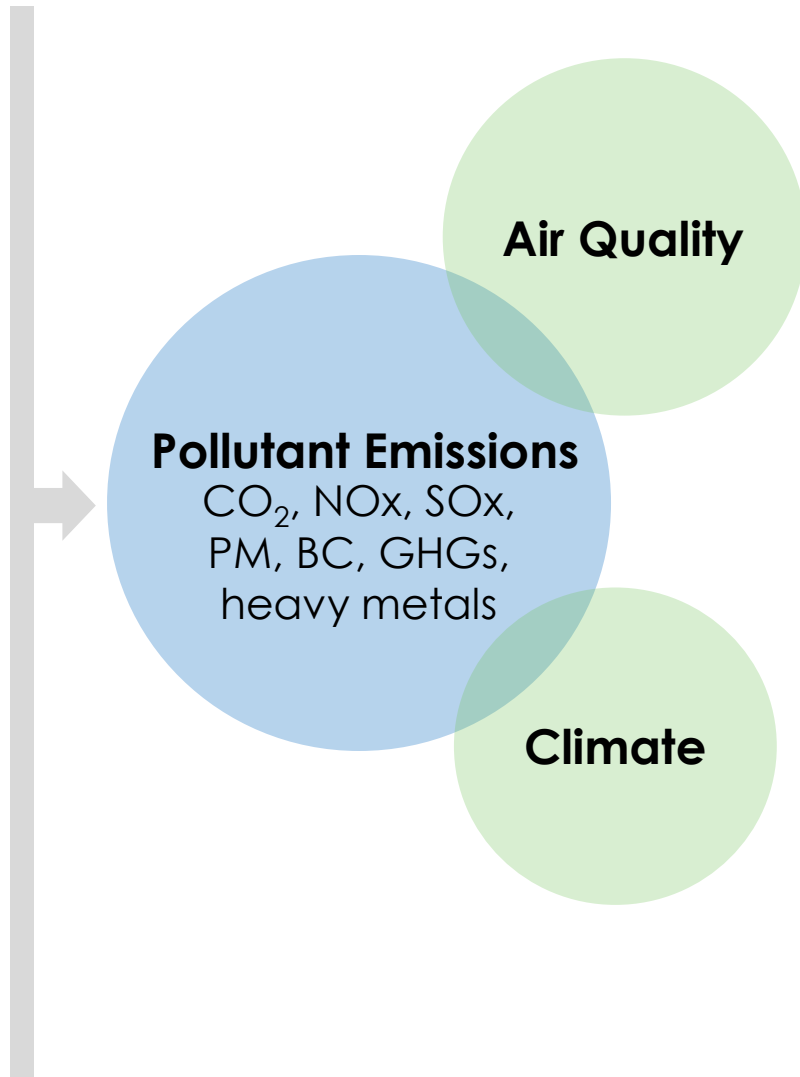

Coal Power Plants

Pollutant Emissions

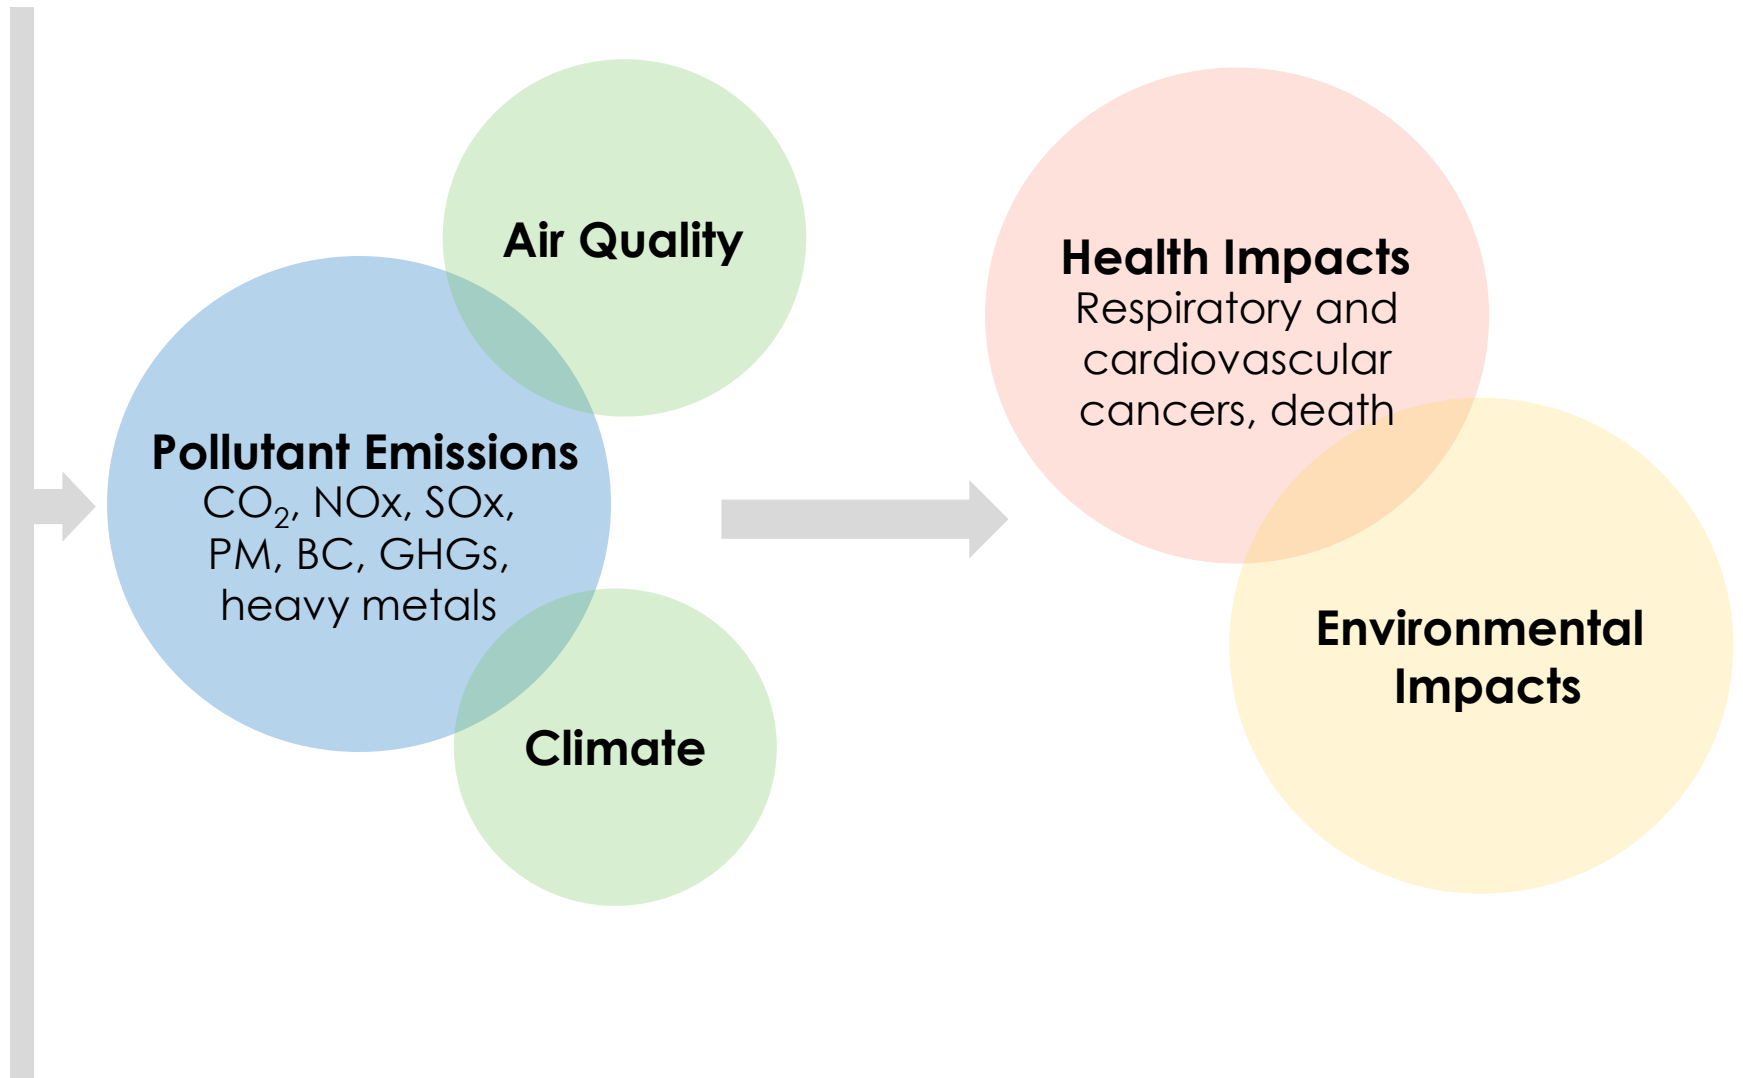

CO₂, NO_x, SO_x,
PM, BC, GHGs,
heavy metals

Coal Power Plants

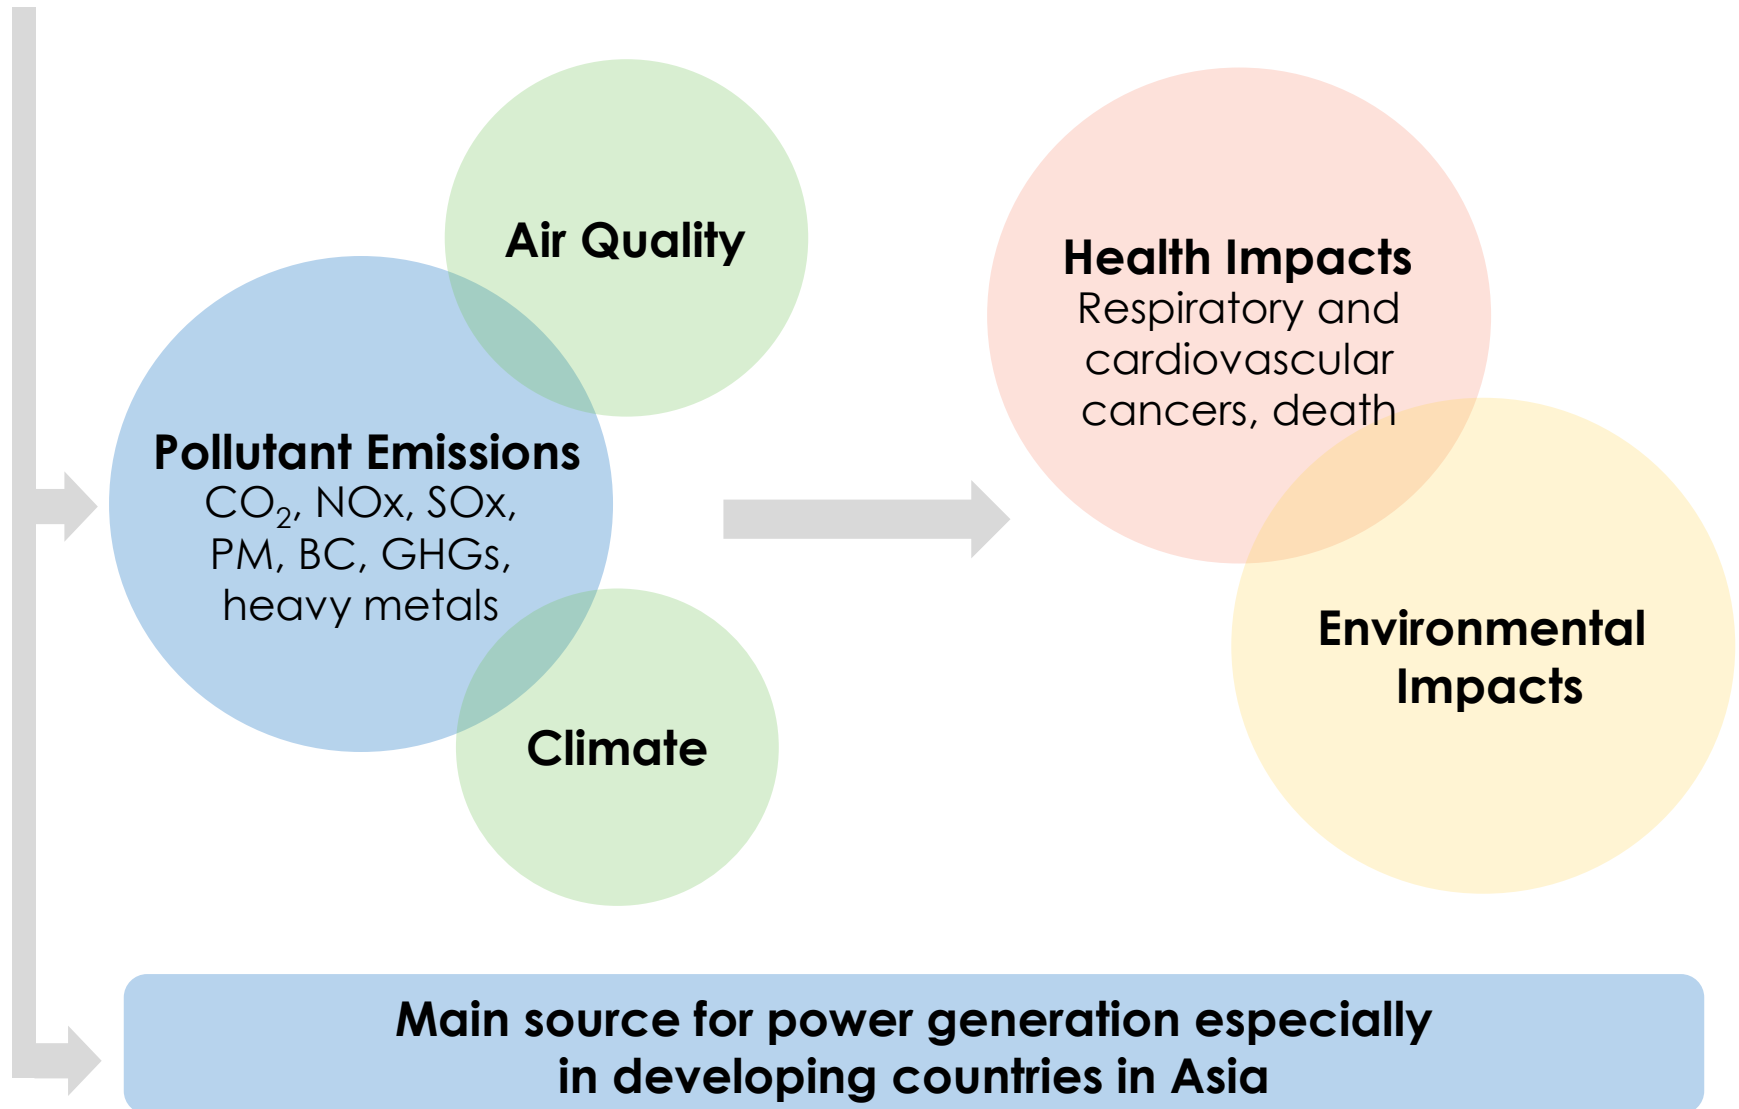

Coal Power Plants

(UN Environment, 2017;
Munawar, 2017; Koplitz et al, 2017)

Coal Power Plants

(UN Environment, 2017;
Munawer, 2017; Koplitz et al, 2017)

The medium-term goal is to shift to renewable energy sources. However, for countries still dependent on coal-fired power plants, the near-term action needed to ensure that the health of people and the environment are protected is -

The medium-term goal is to shift to renewable energy sources. However, for countries still dependent on coal-fired power plants, the near-term action needed to ensure that the health of people and the environment are protected is -

To **strengthen emission standards** for coal-fired power plants

Comparison of Emission Standards for Coal Fired Power Plants

(World Coal Association, 2017)
