

Network on Citizens Engagement for Better Air Quality

Air Quality and its Impact on Health

BAQ Conference Kuching, November 15th, 2018

Dorothee Saar, saar@duh.de

NO2: Broad Exceedance and 34 Legal Cases

- Today, 10 Cities have to include bans into air quality plan
- By end of 2018, 14 decisions expected
- Legal cases require official air quality data
- However: From more than 1.000 cities, only 120 have monitoring stations, measurements in four meter high

Court Decisions and Dieselgate bring High attention on Air Quality and Health

- Citizens support NO2 measurements
- Various campaigns in European cities ongoing

Our aim:

- Fill blank areas and provide solid quality and reliability of data
- Raise awareness and inform about consequences
- Show alternatives and campaign for achieving them

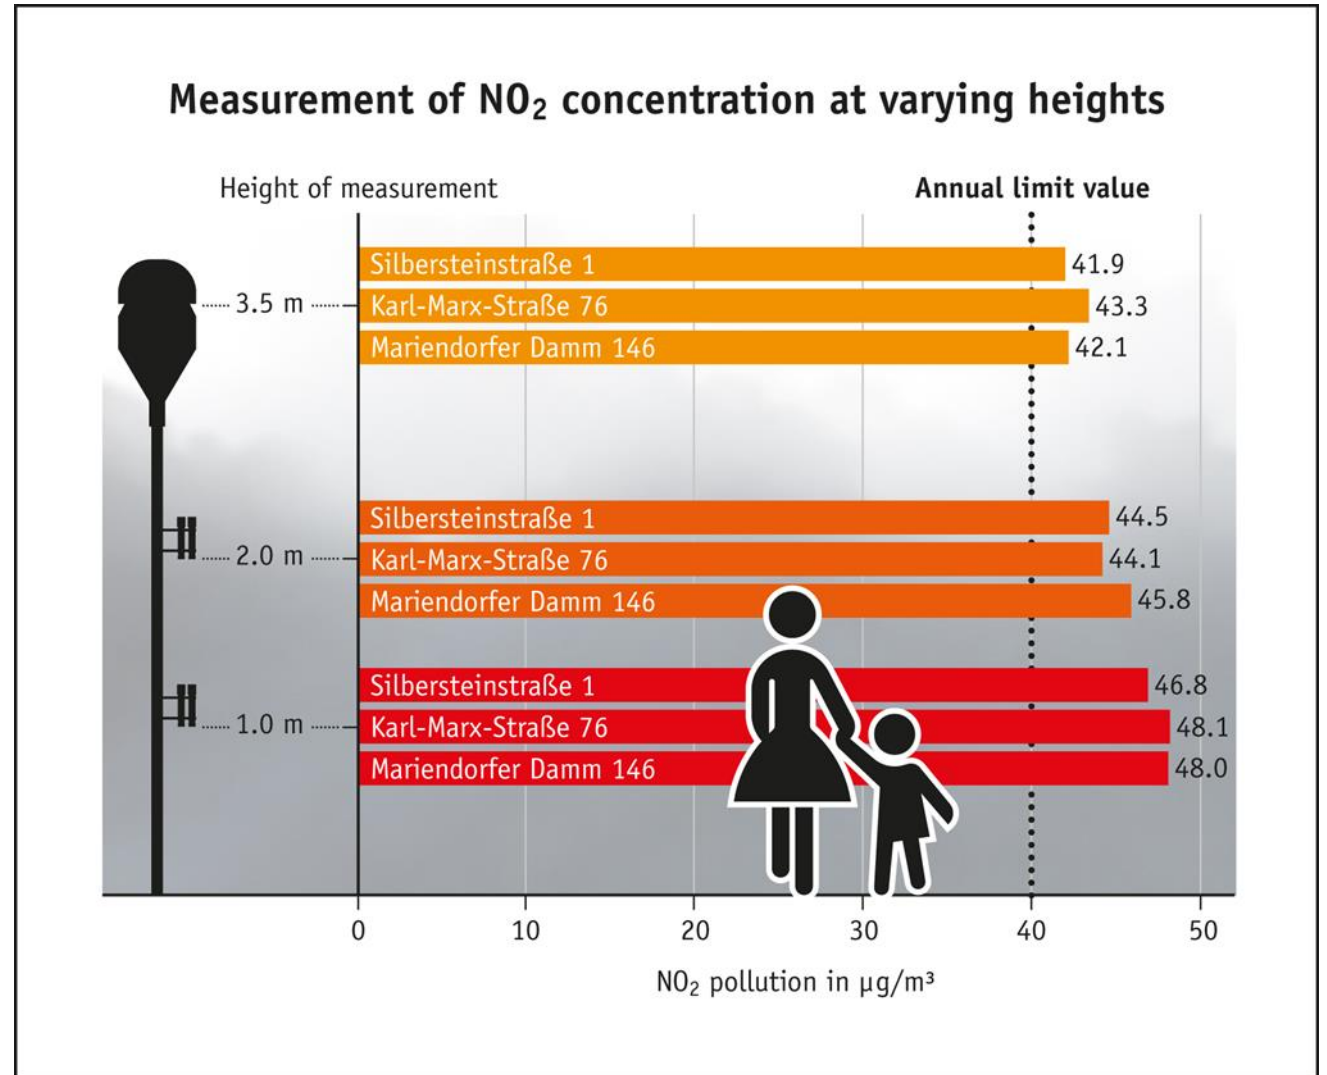

#abgasalarm

Legende: ● ≥ 40 ug Belastung ● ≥ 30 bis < 40 ug ● ≥ 10 bis < 30 ug ● < 10 ug

- Official requirement: Measure between 2 m and 4 m
- However, children breathe in lower height
- Children have higher breathing rate and are sensitive with regard to development of lungs

- Reduce individual motorized transport and increase public transport, cycling and walking in urban regions
- Achieve better quality of life with regard to road safety, noise, space, a healthie environment

Thank you!
